PRELIMINARY PLAT SUBMITTAL REQUIREMENTS FOR DEVELOPMENT REVIEW

The complexity of the proposed preliminary plat will dictate whether all of the items below are needed for a complete submittal. If there are any questions as to which items are needed, please contact the Community Development Department prior to submitting.

Site Survey - All of the existing site features, including property lines (including metes and bounds), right-of-ways, streets, buildings and structures, driveways and parking lots, public and private sidewalks, landscaping, utilities, topography, easements (including book and page) and legal description should be provided.

Dimension Plan - All proposed lots (including right-of-way and parkland dedication) should be accurately shown to scale and dimensioned (including lot areas). Additionally, narrative information such as property owner, legal description, vicinity sketch, property zoning, and benchmark should be included.

Grading Plan - Existing and proposed topography should be provided at a maximum interval of 5-feet. Although the anticipated grading is conceptual, additional detailing of unique conditions along waterways/creeks/ditches or areas that may require significant retaining walls may be required.

Utility Plans - Existing and proposed utilities should be accurately shown on the preliminary plat. Although conceptual, utilities should be shown to all proposed lots and sized to accommodate the demand generated by the project and any upstream loading. Stormwater management facilities should be shown and a preliminary drainage report may be required.

Landscape Plan - Existing and proposed landscape features should be accurately shown (required street trees and buffer plantings). A general indication on the types of trees and minimum installed sizes should be included.
